

## Hazelnut Cream

Hazelnuts are the perfect addition for creating bold, heart-healthy snack foods. It is highly nutritive – other than being a high-quality source of protein and fibre, hazelnut is also known as an excellent source of Vitamin E and mono-unsaturated fats. Hazelnuts are valued for their ultra-indulgent taste and upscale appeal as they go with a variety of flavours and can be used to create wonderfully rich and exotic new combinations.

Euronut's hazelnut creams are semi-finished products designed for ready application to the food sector, requiring no further processing in the finished product.

### Product Properties:

- Pleasant, characteristic taste of roasted hazelnut
- Can be added to any bakery or chocolate products as fillings or used as spreads
- Customisable based on the percentage of used hazelnuts, application, baking stability and the inclusion of other ingredients

### Product Range:
